## Abstracts

The global Laser Scattering Particle SizeDistribution Analyzer market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The principle of Laser Scattering Particle SizeDistribution Analyzer is that when light is propagating, the wavefront is limited by pores or particles that are equivalent to the wavelength scale. The emission from each element wave at the restricted wavefront interferes in space to produce diffraction and scattering. The spatial (angular) distribution of diffracted and scattered light energy is related to the wavelength of the light wave and the size of the pores or particles.
