Abstracts

According to our (Global Info Research) latest study, the global Last-mile Services market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In supply chain management last-mile describes a similar problem for transporting either people or freight. In freight networks, parcels can be delivered to a central hub efficiently via ship, train or other means, but they must then be loaded into smaller vehicles for delivery to individual customers. In transportation networks, 'last mile' describes the rising marginal cost of getting people from a transportation hub such as an airport or train station to their final destination.
