Abstracts

Sealant is a substance used to block the passage of fluids through the surface or joints or openings in materials, a type of mechanical seal. In building construction sealant is sometimes synonymous with caulking and also serve the purposes of blocking dust, sound and heat transmission. Sealants may be weak or strong, flexible or rigid, permanent or temporary. Sealants are not adhesives but some have adhesive qualities and are called adhesive-sealants or structural sealants.

The main difference between adhesives and sealants is that sealants typically have lower strength and higher elongation than adhesives do. When sealants are used between substrates having different thermal coefficients of expansion or differing elongation under stress, they need to have adequate flexibility and elongation. Sealants generally contain inert filler material and are usually formulated with an elastomer to give the required flexibility and elongation. They usually have a paste consistency to allow filling of gaps between substrates. Low shrinkage after application is often required. Many adhesives can be formulated into sealants.

There are mainly two kind of Latex Sealant, including including EVA Sealant and Acrylic Sealant.

Scope of the Report:

This report focuses on the Latex Sealant in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Acrylic Latex Sealant emerged as the leading product segment in the overall market for Latex Sealants and accounted for 44.48% of total market volume in 2016. EVA Latex Sealant followed epoxy adhesives which accounted for 38.06% of total market volume in 2016.

Nowadays, North America and Europe account for nearly half of the global Latex Sealant production and consumption. Asia Pacific is the most active region in the nearly future because of the drive of downstreams

Growth of the Latex Sealant market is largely associated with the growth in the construction industry. The construction industry is expected to push the adhesive industry to new heights, which in turn will help the construction market achieve greater volumes and revenues in the near future; hence this drives the demand for adhesive at a significant pace.

The worldwide market for Latex Sealant is expected to grow at a CAGR of roughly 4.5% over the next five years, will reach 640 million US\$ in 2023, from 490 million US\$ in 2017, according to a new GIR (Global Info Research) study.
