Abstracts

Layer 3 Industrial Ethernet Switches are devices with three-layer network switching functions. They can forward and filter data packets based on IP address, subnet mask, MAC address and other information. Different from traditional Layer 2 switches, Layer 3 switches can not only exchange data within the same subnet, but also exchange data between different subnets to realize data transmission across network segments. At the same time, Layer 3 switches also have higher performance and richer network management functions, and are suitable for various complex industrial application scenarios.

According to our (Global Info Research) latest study, the global Layer 3 Managed Industrial Ethernet Switch market size was valued at US$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.
