Abstracts

According to our (Global Info Research) latest study, the global Layer Feed Additives for Laying Hens market size was valued at US\$ 9206 million in 2025 and is forecast to a readjusted size of US\$ 12346 million by 2032 with a CAGR of 3.9% during review period.

Layer feed additives for laying hens are non-nutritive or nutritive substances added to the diets of laying hens to improve egg production, egg quality, gut health, immunity, and feed efficiency. In 2025, global layer feed additives production reached approximately 1,626K ton, with an average global market price of around USD 5,500 per ton. A factory gross profit of USD 1,100 per ton with 20% gross margin. A single line full machine capacity production is around 6K ton per line per year. The upstream is dependent on vitamins, amino acid and probiotic enzymes. The downstream demand is concentrated in feed manufacture, commercial breeder and organic layers. A postbiotic and saponin blend improved flock health, and sustained egg production during disease challenge. China and India market driven by high demand consumption and massive livestock population.

This report is a detailed and comprehensive analysis for global Layer Feed Additives for Laying Hens market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Layer Feed Additives for Laying Hens market size and forecasts, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Layer Feed Additives for Laying Hens market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Layer Feed Additives for Laying Hens market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Layer Feed Additives for Laying Hens market shares of main players, shipments in revenue (\$ Million), sales quantity (Tons), and ASP (US\$/Ton), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Layer Feed Additives for Laying Hens

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Layer Feed Additives for Laying Hens market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Cargill, ADM, DSM-Firmenich, BASF, Evonik, Novonosis, Alltech, Nutreco, Charoen Pokphand, Adisseo, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Layer Feed Additives for Laying Hens market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.
