According to our (Global Info Research) latest study, the global LCD Signage market size was valued at USD 147.1 million in 2023 and is forecast to a readjusted size of USD 198.9 million by 2030 with a CAGR of 4.4% during review period.

LCD signage is a type of digital signage. Digital displays use technologies such as LCD, LED and Projection to display content such as digital images, video, streaming media, web pages, weather data, restaurant menu, or text. They can be found in public spaces, transportation systems, museums, stadiums, retail stores, hotels, restaurants, and corporate buildings etc., to provide wayfinding, exhibitions, marketing and outdoor advertising.

Digital sign displays may be LCD or plasma screens, LED boards, projection screens or other emerging display types like interactive surfaces or organic LED screens (OLEDs). Rapidly dropping prices for large plasma and LCD screens have led to a growing increase in the number of digital sign installations.

The global LCD signage market refers to the market for liquid crystal display (LCD) technology used in digital signage applications. LCD signage is commonly used in various sectors such as retail, transportation, healthcare, hospitality, and education, among others, for advertising, information display, and interactive purposes. According to a report by Market Research Future, the global LCD signage market was valued at USD 19.01 billion in 2020 and is projected to reach USD 32.23 billion by 2026, growing at a CAGR of 9.32% during the forecast period. The market growth is driven by several factors, including the increasing demand for digital signage solutions for effective advertising and brand promotion, the growing adoption of interactive displays for enhanced customer engagement, and the rising deployment of LCD signage in

transportation infrastructure for information dissemination. The Asia Pacific region is expected to hold a significant share in the global LCD signage market during the forecast period. This can be attributed to the increasing adoption of digital signage technology in countries like China, Japan, and South Korea, among others, for various applications such as retail advertising, public transportation, and hospitality. Key players in the global LCD signage market include Samsung Electronics Co. Ltd., LG Display Co. Ltd., NEC Display Solutions Ltd., Sharp Corporation, and Sony Corporation, among others. These companies are focusing on product innovation and technological advancements to introduce display screens with higher resolutions, better image quality, and improved energy efficiency. They are also involved in partnerships, acquisitions, and collaborations to expand their product portfolios and customer base globally.
