Abstracts

'Lead Acid UPS Battery is the Lead-Acid battery used in the UPS.

Lead-Acid battery uses a chemical reaction to do work on charge and produce a voltage between their output terminals. Despite having a very low energy-to-weight ratio and a low energy-to-volume ratio, its ability to supply high surge currents means that the cells have a relatively large power-to-weight ratio. These features, along with their low cost, make it attractive for use in many fields, like motor vehicles, motorcycle, transport vehicles, electrical bicycle, etc.'
