The global Lead-Free No-Clean Flux market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Lead-free no-clean flux is lead-free and require no cleaning. After conventional flux soldering, there are many residues left on the board surface, which is easy to cause electric leakage or corrode the board surface, and requires special cleaning agent or board washing water to clean. Lead-free no-clean flux leaves behind flux with low residue.
