Abstracts

The global Leak Detection and Repair (LDAR) market size is expected to reach \$ 34630 million by 2032, rising at a market growth of 6.1% CAGR during the forecast period (2026-2032).

LDAR (Leak Detection and Repair) regulations were implemented by the United States Environmental Protection Agency (USEPA) over 35 years ago to control fugitive emissions (uncontrolled emissions) from regulated sources in order to protect human health and the environment from harmful pollutants released by industry and mobile sources. An LDAR program is the system of procedures a facility utilizes to locate and repair leaking components, including valves, pumps, connectors, compressors, and agitators, in order to minimize the emission of fugitive volatile organic compounds (VOCs) and hazardous air pollutants (HAPs).

The key players of Leak Detection and Repair (LDAR) include SGS S.A., GHD, Team Inc, etc. The top three players of Leak Detection and Repair (LDAR) account for approximately 10% of the total market. North America is the largest market of Leak Detection and Repair (LDAR) accounting for about 40%, followed by Europe and Asia-Pacific. In terms of Type, Portable Analyzer is the largest segment, with a share about 38%. And in terms of Application, the largest application is Oil and Gas Production Facilities, followed by Petroleum Refineries.
