According to our (Global Info Research) latest study, the global Leak Sealer market size was valued at US\$ 36310 million in 2025 and is forecast to a readjusted size of US\$ 50840 million by 2032 with a CAGR of 5.0% during review period.

Leak sealer is designed to address and repair leaks in liquids or gases. Its primary function is to halt leaks in structures, including water and gas pipes, roofs, and building walls. Beyond merely sealing leaks, it reinforces the affected area, offering weather resistance and long-term durability. Leak sealer serves as both an immediate fix and a component of preventative maintenance strategies.

Available types include silicone and polyurethane sealers, each suitable for application on surfaces or for injection into crevices. Water leak sealers are notably resistant to water and wear, whereas gas leak sealers excel in air-tightness.
