According to our (Global Info Research) latest study, the global LED Explosion-Proof Lamp market size was valued at USD 741.2 million in 2023 and is forecast to a readjusted size of USD 1225.2 million by 2030 with a CAGR of 7.4% during review period.

LED Explosion-Proof lamp (also known as hazardous area lighting, hazardous location lighting and safe lights) have a hazardous area certification to provide efficient lighting for areas exposed to hazardous vapors, gases or dust.

This industry is highly fragmented. Most companies are small except for a few large companies. These small businesses have different levels of technical management and production management.

Especially in China, many small companies blindly imitate the products of large enterprises. In the competition, these companies often occupy the market by low prices. LED explosion-proof lamp industry concentration is too low, which can only rely on increasing the supervision of product quality and relying on the continuous purification of the market to gradually solve. With the continuous development of key enterprises in the industry, some small enterprises will gradually withdraw from the LED explosion-proof lamp market. Of the major players of LED-Based Lamps Used in Explosion-Proof Lighting, Ocean'S King Lighting maintained its first place in the ranking in 2022, followed by Eaton and Emerson Electric. Top 3 players accounted about 30% global market share.
