Abstracts

The global LED Grid Screen market size is expected to reach \$ 80470 million by 2029, rising at a market growth of 7.9% CAGR during the forecast period (2023-2029).

With the development of the outdoor media market, people's demand for LED grid screens will also soar. When the area of the LED screen is too large, it poses a great challenge to the steel structure of the screen and the load-bearing capacity of the original building structure. Due to its light weight, small wind load, and flexible installation, LED grid screens have become the first choice for outdoor media to build large screens.

The LED grille screen has a strip, hollow, and light-transmitting product form, also known as curtain screens, curtain wall screens, Maipu brilliant grating screens, etc. Because of its lightweight, small wind load, and flexible installation, it has more for flexible applications, it is usually used for building exterior walls and stage LED rental display screens, etc.

This report studies the global LED Grid Screen production, demand, key manufacturers, and key regions.
