Abstracts

The global LED Illuminated Grille market size is expected to reach \$ 657.2 million by 2029, rising at a market growth of 48.1% CAGR during the forecast period (2023-2029).

LED Illuminated Grilles can personalize the front face of the car and increase the recognition of the car brand. Especially at night, the luminous grille can play a lighting role, making the front face more technological and making the entire vehicle look cooler. Starting in 2019, high-end car manufacturers such as BMW adopted Automotive Illuminated Grille in their models, setting a precedent for the market. With the continuous advancement of technology, the Automotive Illuminated Grille market shows broad prospects and is expected to expand to more automobile manufacturers and models, covering the high-end to mid-low-end markets.

LED Illuminated Grille is an important part of the car, and the technology involved is also very high-end and advanced. As the electrification of automobiles develops faster and faster, the air intake function of traditional grilles begins to weaken. In some new car companies, the grilles gradually disappear or become smaller. Some car companies also add interactive elements to the grille design. Digital elements with mainly decorative functions, Automotive Illuminated Grilles emerged at the historic moment.
