LED lamp bead bracket is a structure used to carry and fix LED lamp beads, which is widely used in various LED lighting products. The lamp bead bracket can simplify the installation process of LED lamp beads and improve production efficiency. The design of the lamp bead bracket can be customized according to different LED lamp bead types and application scenarios to meet different needs. As the base material of the lamp bead, the LED bracket is an important material of the LED lamp bead and the carrier of the LED chip. The bracket is responsible for heat dissipation and conduction, and the thermal resistance and initial defective rate of the lamp bead.
