According to our (Global Info Research) latest study, the global LED Lighting Supply market size was valued at USD 9122.5 million in 2023 and is forecast to a readjusted size of USD 12820 million by 2030 with a CAGR of 5.0% during review period.

LED lighting power supply is an electronic device that converts the power supply to a specific voltage and current by adjusting the power of the LED to drive the LED light. Due to the working principle of LED lamps and lanterns, the output voltage should be greater than the conduction voltage of LED, followed by the requirement that the working current should not be greater than the rated current of LED. When the LED operating current exceeds the rated current, the LED will quickly appear aging damage. Therefore, the LED lighting power supply is needed for power supply conversion. LED lighting power supply has the characteristics of high reliability, high power and high efficiency.

Global key players of LED lighting supply include Mean Well, Murata, Signify, OSRAM etc. The top three manufacturers held 13.12% of the market. China is the largest market, has a share about 57.32%, followed by North America and Europe, with share 17.26% and 14.04%, separately.
