Led Paver Lights are recessed lighting products that integrate LED sources, drivers, sealed electrical structures, and glass or metal housings into paved ground surfaces for pathways, plazas, landscapes, commercial streets, hospitality exteriors, and night-tourism projects. Their core value is to provide guidance lighting, border definition, and decorative ambience while meeting walk-over or even partial drive-over requirements, so they should be classified as outdoor architectural and landscape lighting rather than display products. In 2025, Global Led Paver Lights sales is at about 13.5 million units, with an average ex-factory price of about US\$21/unit, and total industry capacity of about 20.0 million units per year, and a gross margin range of about 24%–34%. The Led Paver Lights industry chain starts with LED packages, drivers, tempered glass, stainless steel or die-cast metal parts, and sealing materials, moves through optical and structural design plus luminaire assembly, and ends in municipal landscape, commercial streetscape, hospitality, tourism-lighting, and garden paving projects.
