Abstracts

The global LED Thermal Products market size is expected to reach \$ 6508 million by 2032, rising at a market growth of 10.9% CAGR during the forecast period (2026-2032).

Most of the electricity in an LED becomes heat rather than light (about 70% heat and 30% light). If this heat is not removed, the LEDs run at high temperatures, which not only lowers their efficiency, but also makes the LED less reliable. Therefore, LED Thermal Products are used to remove or decrease the heat that created by LED.

Global LED Thermal Products key players include Sunonwealth, Aavid Thermalloy, Cree Inc., SiTime(Mega), etc.

China is the largest market, with a share nearly 30%, followed by Europe and North America, both have a share over 45 percent.

In terms of product, Heat Sink covered over 35 % of the market share, and is projected to dominate the market. And based on of application, the largest application is Residential, followed by Office, etc.

This report studies the global LED Thermal Products production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for LED Thermal Products and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
