LED touch-sensitive luminous door handles are an intelligent door handle that integrates LED lighting technology and touch-sensitive technology. LED touch-sensitive luminous door handles have built-in LED light sources, which can automatically light up when the user approaches or touches them, providing soft and bright lighting effects, which is convenient for users to operate and increases the aesthetics and technological sense of the door handles. This technology allows users to open and close the door without pressing or turning the door handles hard, just by gently touching or waving their hands. This non-contact operation method not only improves convenience, but also reduces direct contact between hands and door handles, reducing the risk of transmission of microorganisms such as bacteria and viruses. LED touch-sensitive luminous door handles are widely used in various places that require intelligent and convenient access control management, such as smart homes, high-end residences, office buildings, hotels, hospitals, etc. In these places, LED touch-sensitive luminous door handles can not only improve the user experience and quality of life, but also provide managers with more efficient and safe access control management solutions.

LED touch-sensitive luminous door handles combine LED lighting technology and touch-sensitive technology, which not only improves the aesthetics and practicality of door handles, but also enhances user experience. With the continuous advancement of technology, the performance and stability of these products are also constantly improving. In addition to basic lighting and touch-sensitive functions, some LED touch-
