An LED video display wall refers to a large-scale display system that is constructed using numerous LED (Light Emitting Diode) modules arranged in a grid-like pattern. These modules, also known as LED panels or tiles, are seamlessly tiled together to form a large, visually cohesive video display.

LED video display walls have gained popularity in various settings due to their high brightness, vibrant colors, wide viewing angles, and flexibility in creating large, high-resolution displays. They are commonly used in venues such as sports arenas, concert halls, exhibition centers, retail stores, command centers, and corporate environments for advertising, entertainment, information dissemination, and visual communication purposes.

The LED video display wall market has experienced significant growth over the past decade, driven by the increasing adoption of LED technology in various applications such as advertising, sports, retail, transportation, and events. LED video walls offer advantages such as high brightness, energy efficiency, durability, scalability, and flexibility, making them a preferred choice for large-scale displays.
