Abstracts

According to our (Global Info Research) latest study, the global Legionella Testing and Analysis Service market size was valued at US\$ 397 million in 2025 and is forecast to a readjusted size of US\$ 683 million by 2032 with a CAGR of 8.0% during review period.

Legionella testing and analysis services refer to services provided by third-party laboratories, certified testing organizations, and professional water hygiene service providers with capabilities in microbial testing, environmental water quality analysis, or public health testing. These services include Legionella sampling, culture, quantitative detection, molecular detection, result interpretation, report issuance, retesting and verification, and necessary source tracing for environmental water samples from building hot and cold water systems, cooling towers, industrial circulating water, medical institution water systems, hotel and public facility water systems, spas/hot springs/swimming pools, dental water lines, and ship drinking water.

From a demand structure perspective, medical institutions, elderly care facilities, hotels, commercial real estate, cooling towers, and industrial circulating water remain the most important application scenarios. Medical institutions and elderly care facilities prioritize infection control and protection of high-risk groups, resulting in higher testing frequency and reporting requirements. Hotels, public facilities, and commercial buildings are driven more by compliance, brand risk, and water system safety after reopening. Cooling towers, evaporative cooling systems, and wet scrubbers are driven by industrial safety and regional regulations. The Chinese market is currently in the stage of increasing institutionalized testing and third-party testing penetration. Centralized air conditioning and ventilation systems, public place water systems, industrial circulating cooling water, and hospital logistics water systems will constitute the main sources of growth, but

domestic manufacturers need to further strengthen the disclosure of publicly available product pages, qualification certificates, and traceable case studies.
