Lens cleaning pens are specialized tools designed for cleaning camera lenses, eyeglasses, binoculars, and other optical devices. They usually have a dual-function design:  
**Brush:** One end of the pen features a retractable brush that helps remove dust and loose particles from the lens surface. This is useful for preventing scratches that can occur if particles are wiped directly onto the lens.  
**Cleaning Tip:** The other end typically has a soft, non-abrasive cleaning pad or tip that is coated with a special cleaning compound. This compound helps to remove smudges, fingerprints, and other residues without damaging the lens.  
The compact size and convenience of lens cleaning pens make them a popular choice for maintaining the cleanliness of optical equipment. They're especially handy for on-the-go use and are often included in camera or photography gear kits.
