Lentil Protein Concentrate is a plant-based protein ingredient derived from lentils through mechanical and aqueous processing to concentrate protein content while retaining functional properties. It offers good solubility, emulsification, and nutritional value, making it suitable for use in meat alternatives, dairy alternatives, sports nutrition, and functional food formulations.

The industrial chain of Lentil Protein Concentrate includes upstream lentil cultivation and raw lentil sourcing. The midstream focuses on protein extraction, separation, concentration, drying, and quality control. Downstream applications cover plant-based meat products, protein beverages, bakery, snacks, and nutritional supplements, supported by formulation development and food processing services.

This report studies the global Lentil Protein Concentrate production, demand, key manufacturers, and key regions.
