Less than Container Load (LCL) is a shipping method where goods from multiple shippers are consolidated into a single container. This allows shippers with smaller quantities of cargo that don't require a full container to share space and cost with other shippers, making it an economical choice for international shipping of small or medium-sized cargo. LCL shipments are usually consolidated by freight forwarders, who combine various shipments, ensuring efficient use of container space and lowering individual shipping costs.

The market for Less than Container Load (LCL) shipping has been growing steadily, driven by the need for more flexible and cost-effective shipping options, especially for small and medium-sized enterprises (SMEs).
