## Abstracts

The global LEV Battery Packs market size is expected to reach \$ 28756 million by 2032, rising at a market growth of 7.6% CAGR during the forecast period (2026-2032).

In 2025, global shipments of LEV battery packs are estimated at approximately 148 GWh, with an average selling price of around USD 118 per kWh. LEV (Low-Speed Electric Vehicle) battery packs are power battery systems designed to provide energy storage for low-speed electric vehicles, including electric two-wheelers, electric tricycles, electric scooters, electric golf carts, and neighborhood electric vehicles. These battery packs typically consist of multiple lithium-ion cells or lead-acid battery units and integrate battery management systems (BMS), protection circuits, and structural housings to ensure safe and stable charging and discharging. As lithium-ion battery costs continue to decline and energy density improves, LEV battery packs are gradually transitioning toward lithium-based chemistries, while pack design is increasingly moving toward modularization and standardization to meet large-scale production requirements of vehicle manufacturers.

From a market structure perspective, LEV battery packs represent one of the larger shipment segments within the broader power battery industry, with demand closely linked to the development of electric two-wheelers and other light electric vehicles. Asia, particularly China, Southeast Asia, and India, accounts for the largest concentration of demand. Industry competition mainly focuses on battery cell cost control, pack-level safety design, cycle life performance, and distribution channel coverage. As safety and environmental regulations for electric vehicles become stricter in many countries, lithium battery penetration in the LEV sector continues to increase, while battery swapping models, battery standardization, and long-life cell technologies are gradually reshaping the industry structure.

This report studies the global LEV Battery Packs production, demand, key manufacturers, and key regions.
