Abstracts

According to our (Global Info Research) latest study, the global LF End Glow Fiber Cable market size was valued at US\$ 91.23 million in 2025 and is forecast to a readjusted size of US\$ 148 million by 2032 with a CAGR of 7.3% during review period.

In 2025, global production of LF end glow fiber cable reached 806 million meters, with an estimated average selling price of US\$0.11 per meter. LF end glow fiber cable refers to illumination-grade plastic optical fiber products that use PMMA, modified PMMA, or other transparent polymers as the core material, fluoropolymers or transparent sheath materials as the cladding/sheath, and primarily output light through the fiber end face. The core function of LF-terminal optical fiber cables is to conduct light from LED, halogen, or laser/light engines along the fiber core, forming point, star, or end-face clustered lighting effects at the fiber ends. They are characterized by flexibility, cutability, low-voltage safety, photoelectric separation, moisture resistance, ease of installation, and strong decorative appeal. They are primarily used in starry sky ceilings, automotive starry sky ceilings and interior ambient lighting, hotel/club/cinema decoration, museum display case lighting, jewelry and commercial displays, swimming pool water features, fountains, saunas, architectural outline lighting, fiber optic chandeliers, and art installations. The upstream mainly includes MMA monomers, PMMA optical-grade resin, fluoropolymer cladding materials, PVC/PE/LSZH sheathing materials, masterbatches, UV-resistant additives, extrusion equipment, fiber drawing equipment, precision molds, testing instruments, and LED light sources; the midstream consists of manufacturers of bare PMMA fibers, sheathed optical fibers, fiber bundles, fiber optic lighting cables, and customized components; the downstream includes automotive interior manufacturers, the aftermarket, architectural lighting contractors, commercial space design companies, stage lighting companies, fiber optic lighting

fixture manufacturers, home improvement DIY channels, and industrial sensing customers. Gross profit margins range from approximately 25% to 40%.
