According to our (Global Info Research) latest study, the global LFA-based Cardiac market size was valued at USD 3699.5 million in 2023 and is forecast to a readjusted size of USD 6161.8 million by 2030 with a CAGR of 7.6% during review period.

Lateral Flow Assay is a simple to use diagnostic device used to confirm the presence or absence of a target analyte, such as pathogens or biomarkers in humans or animals, or contaminants in water supplies, foodstuffs, or animal feeds.

Cardiac biomarkers are the substances released into the blood stream from the damaged muscle of the heart. These biomarkers are used to diagnose heart functioning, risk stratifications, and cardiac diseases in patients. Biomarker is a quantifiable and measurable biological parameter that includes an enzyme, hormones, and proteins, all associated with heart function, failure, or damage.

The industry's leading producers are Roche, Abbott and Siemens, with revenues of 26.24%, 16.11% and 11.04% respectively in 2019.
