Abstracts

The global LFT for Automobile market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In China market, key players of LFT for automobile include Shanghai PRET Composites, Kingfa, Nan Ya Plastics (Formosa Plastics), etc. Top three players hold a share approximately 30%.

Long fiber reinforced thermoplastic composites (LFT) refer to long fibers impregnated with a special resin system through a special mold to obtain long strips fully infiltrated by the resin, and then cut into required lengths as required.

Long Fiber Thermoplastics (LFT) is a type of easily mouldable thermoplastic used to create a variety of components used primarily in the automotive industry. Using LFT reinforcements in the thermoplastic composite process enables molders to produce structural and semi-structural parts, compounding the fiber glass in line with injection or compression molding techniques.
