LFT Mould is a tool used to produce long fiber reinforced thermoplastics (LFT) products. LFT is a long fiber reinforced thermoplastic composite material. Long fibers are impregnated with a resin system through a special mold to obtain long strips fully impregnated with resin, and then cut into the required length as needed. LFT molds are usually customized according to the specific shape, size and performance requirements of the product. They have high processing accuracy and surface quality, high durability and service life, and are widely used in the automotive industry, furniture manufacturing, aerospace, construction and other fields.
