## Abstracts

According to our (Global Info Research) latest study, the global Library Smart Terminal market size was valued at US\$ 949 million in 2025 and is forecast to a readjusted size of US\$ 1349 million by 2032 with a CAGR of 5.4% during review period.

Library smart terminals typically refer to self-service devices and intelligent interactive terminals deployed within libraries for readers or librarians, such as self-service borrowing and returning machines, self-service card issuing machines, self-service inquiry machines, smart bookshelves, and book reservation lockers. They generally integrate touchscreens, human-computer interfaces, RFID/barcode recognition modules, card readers (library cards/ID cards), printing modules, barcode scanners, and network communication modules. They transform traditional 'manual service windows' into 'self-service,' alleviating librarian workload, improving borrowing and returning efficiency, and reducing queuing time. The average price of this product is approximately \$5,000 per unit, with global sales of approximately 180,000 units.
