Abstracts

Growing need for packaging material that leads to high productivity and less stress on machines had led to an ever increasing demand for lidding foil market. Lidding foils are used to give a consummate conclusion to the container as well as assurance from external impacts. Lidding foils are also preferred due to their smooth and robust peel which is well suited for clean room environments. Lidding foils provide barrier protection which is approximately five times better than other lidding material. Not only this, they also offer many advantages to the packaging machinery operators as they run more efficiently on the packaging lines providing fewer hang ups and rejects as compared to their counterparts.
