The lifting height limiter is a safety protection device used in lifting machinery. It is mainly used to monitor the lifting position of the hook or spreader, and automatically sound an alarm or cut off the lifting power when the set maximum lifting height is reached to prevent the hook from overwinding or the wire rope from being overwound, thereby effectively avoiding equipment damage and personal injury. The device is widely used in lifting equipment such as bridge cranes, tower cranes, electric hoists, etc., and is an important part of ensuring the safe operation of lifting operations.
