## Abstracts

A lifting magnet is an electromagnet designed to pick up or lift metal objects. These magnets vary widely in size and can be as small as a credit card or as large as a twin-sized bed. Usually, the larger lifting magnets are operated hung from a chain on a crane that is able to dangle the magnet into the location necessary to retrieve the desired object. This type of magnet can be used for a wide variety of purposes, including automobile junking, construction, and demolition and cleanup.
