Light Agave Nectar is a natural sweetener extracted from the agave plant and is often used as a sweetener to replace sucrose or other sugars. Compared to dark agave nectar, light agave nectar is lighter in color, has a lighter taste and is less sweet. It is widely used in many foods and beverages due to its low glycemic index and high solubility. The process of making agave nectar involves extracting the sap from the agave plant, which is then filtered and heated to obtain agave nectar.
