Abstracts

Light detection and ranging (LiDAR) is an advanced position detection technique. It is used in measurement of accurate and precise positions of physical objects. In LiDAR technology, a guided laser beam is used to locate the accurate position of an object to the scanner of the LiDAR system.

SCOPE OF THE REPORT:

Lack of awareness about the benefits of LIDAR coupled with inadequate knowledge about the working of LIDAR among the inexperienced consumers is acting as one of the major restraints for the global LIDAR market. Moreover, the high initial setup cost of LIDAR system is hindering the wide acceptance of LIDAR system in cost sensitive markets of Asia-Pacific.

North America is the largest market of LiDAR followed by Europe and Asia-Pacific. The market dominance of North America is attributed to wide use of LiDAR system in commercial and defence aviation sectors. Asia-Pacific is the fastest growing market of LiDAR system, owing to the increasing demand of the LiDAR system from the civil construction and mining industries. Also, the increasing defence budget of developing countries, such as China and India, is further boosting the market of LiDAR system in this region.

The global Light Detection and Ranging market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Light Detection and Ranging.

Europe also play important roles in global market, with market size of xx million USD in 2017 and will be xx million USD in 2023, with a CAGR of xx%.

This report studies the Light Detection and Ranging market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Light Detection and Ranging market by product type and applications/end industries.
