Light stabilizer is a chemical substance that can inhibit or weaken the degradation effect of light on polymer materials and improve their light resistance. It can usually be used in conjunction with antioxidants to better inhibit the photocatalytic degradation of polymer materials. Light stabilizer 292 is a versatile liquid alkaline hindered amine light stabilizer used in coatings, printing packaging, adhesives, and sealants. It is used for solvent and external coating applications that meet high performance and durability, including radiation curable systems (UV, electron beam). It can effectively prevent paint diseases such as cracking and loss of gloss, thereby improving the service life of the coating.
