According to our (Global Info Research) latest study, the global Lighter Fluid and Piezoelectric Ceramic market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Lighter fluid and piezoelectric ceramics each play an important role in lighters. Lighter fluid is the fuel of lighters, which provides the necessary energy for the production of flames. This special fuel burns rapidly when stimulated by high temperatures or sparks, creating a flame. Piezoelectric ceramics are the key components in electronic lighters that generate sparks.

Lighter fluid and piezoelectric ceramics work together in a lighter. The former provides fuel and the latter produces sparks, which together realize the function of igniting the fire source.
