Abstracts

The global Lighter Fluid and Piezoelectric Ceramic market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Lighter fluid and piezoelectric ceramics work together in a lighter. The former provides fuel and the latter produces sparks, which together realize the function of igniting the fire source.

Lighter fluid and piezoelectric ceramics each play an important role in lighters. Lighter fluid is the fuel of lighters, which provides the necessary energy for the production of flames. This special fuel burns rapidly when stimulated by high temperatures or sparks, creating a flame. Piezoelectric ceramics are the key components in electronic lighters that generate sparks.
