## Abstracts

According to our (Global Info Research) latest study, the global Linear Electric Actuators market size was valued at USD 1070 million in 2023 and is forecast to a readjusted size of USD 1365.1 million by 2030 with a CAGR of 3.5% during review period.

Electric Linear Actuators are electrically powered, mechanical devices consisting of motors, linear guides, and drive mechanisms, which are used to convert electrical energy into linear displacement through mechanical transmission, electro-magnetism, or thermal expansion to provide straight line push/pull motion. Key specifications include the intended application, drive type, motor type, the mounting configuration, as well as other physical dimensions and electrical characteristics. Electric linear actuators are used primarily in automation applications when a machine component, tool, etc. requires a controlled movement to a particular position. They are used in a wide range of industries where linear positioning is needed. The actuators are driven by several means including ball or lead screws, belts, or voice coils, among others. Typical applications include opening and closing dampers, locking doors, braking machine motions, etc.

North America is the largest Electric Linear Actuators market with about 32% market share. Europe is follower, accounting for about 28% market share.

The key players are THK, IAI, Parker, TiMOTION, LINAK, ABB, SKF, Chiaphua Components, Moteck Electric, Honeywell, Auma etc. Top 3 companies occupied about 43% market share.
