According to our (Global Info Research) latest study, the global Linear Magnetic Drive Sliding Door market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

The Linear magnetic drive sliding door utilizes the principle of the magnetic field: there is the repulsion of the same poles and attraction of the opposite poles. Two parallel magnetic fields are divided into many uniformly sized N and S poles. The thrust and pull forces are generated with the continuous conversion of the magnetic field so that the door body moves continuously.
