The global Linear and Low-Dropout (LDO) Regulators market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Linear and Low-Dropout (LDO) Regulators are a common type of power supply regulator. It reduces the input voltage to a lower output voltage by using linear control elements (such as transistors) and maintains the stability of the output voltage during load changes and input voltage fluctuations. Linear and Low-Dropout (LDO) Regulators are widely used in automobiles, consumer electronics, industrial control, communication equipment, medical equipment and other fields. They provide a stable power supply, ensure the normal operation of the circuit, and provide reliable power management functions.
