According to our (Global Info Research) latest study, the global LinearMotor-driven Transfer Systems market size was valued at USD 508.9 million in 2023 and is forecast to a readjusted size of USD 900.2 million by 2030 with a CAGR of 8.5% during review period.

Linear Motor-driven Transfer Systems are transfer system which derived by linear motors. This system can be used wherever products have to be transported particularly quickly and precisely. This report studies the Linear Motor-driven Transfer Systems market. When assembly processes call for the interlinking of complex processes, Linear Motor-driven Transfer Systems are used for the assembly, testing and inspection of components, and in particular when a deep vertical range of manufacture is required. These systems can also be interlinked with rotary indexing systems to accommodate complex tasks.

The various processing stations are arranged in series to form a chain. This linear chain can be easily expanded and/or contracted, and changes in the assembly sequence can be quickly achieved by exchanging or regrouping the station inserts.

Global 5 largest manufacturers of LinearMotor-driven Transfer Systems are Bosch Rexroth AG, ATS Automation, Rockwell Automation, Festo and Beckhoff Automation, which make up over 77%. Among them, Bosch Rexroth AG is the leader with about 24% market share.
