Abstracts

The global LinearMotor-driven Transfer Systems market size is expected to reach \$ 900.2 million by 2029, rising at a market growth of 8.5% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of LinearMotor-driven Transfer Systems are Bosch Rexroth AG, ATS Automation, Rockwell Automation, Festo and Beckhoff Automation, which make up over 77%. Among them, Bosch Rexroth AG is the leader with about 24% market share.

Asia-Pacific is the largest market, with a share about 39%, followed by North America and Europe, with the share about 25% and 32%. In terms of product type, Small Loads (Below 10Kg) occupy the largest share of the total market, about 48%. And in terms of product Application, the largest application is Automotive Assembly Line, followed by Medical and Life Sciences Assembly Line.

Linear Motor-driven Transfer Systems are transfer system which derived by linear motors. This system can be used wherever products have to be transported particularly quickly and precisely. This report studies the Linear Motor-driven Transfer Systems market. When assembly processes call for the interlinking of complex processes, Linear Motor-driven Transfer Systems are used for the assembly, testing and inspection of components, and in particular when a deep vertical range of manufacture is required. These systems can also be interlinked with rotary indexing systems to accommodate complex tasks.

The various processing stations are arranged in series to form a chain. This linear chain can be easily expanded and/or contracted, and changes in the assembly sequence can

be quickly achieved by exchanging or regrouping the station inserts.

This report studies the global LinearMotor-driven Transfer Systems demand, key companies, and key regions.
