According to our (Global Info Research) latest study, the global Lipid Contract Manufacturing market size was valued at USD 1050.2 million in 2023 and is forecast to a readjusted size of USD 982.5 million by 2030 with a CAGR of -0.9% during review period.

Liposomes and lipid nanoparticles (LNPs) are similar by design, but slightly different in composition and function. Both are lipid nanoformulations and excellent drug delivery vehicles, transporting cargo of interest within a protective, outer layer of lipids. In application, however, LNPs can take a variety of forms. Innovators in the biopharmaceutical industry have developed a number of ways to improve/augment physiochemical properties and ultimately, the drug-like behavior of pharmacological substances. Amidst other alternatives, lipid nanoparticles and liposomes are the main type. Nanoparticle Drug Delivery Systems are engineered technologies that use nanoparticles for the targeted delivery and controlled release of therapeutic agents. The modern form of a drug delivery system should minimize side effects and reduce both dosage and dosage frequency. Recently, nanoparticles have aroused attention due to their potential application for effective drug delivery. Liposomes and Lipid Nanoparticles are delivery carriers, the primary lipids used to make liposomes or Lipid Nanoparticles are Phospholipids, Pegylated Lipids, Ionizable Lipids (Cationic / Anionic Lipids), Triglycerides, Sphingolipids, Neutral Lipids, etc. In our report, we mainly study the Liposomes and Lipid Nanoparticles (LNP) Contract Manufacturing as delivery carriers.

Global core lipid contract manufacturing companies include Merck KGaA, Exelead and Avanti Polar Lipids etc. The top 3 companies hold a share about 38%. North America is the largest market, with a share over 60%, followed by Europe and APAC with the share

about 26% and 12%.

In terms of product, lipid nanoparticles is the largest segment with a share about 79%. And in terms of application, the largest application is commercial with a share about 67%, followed by clinical and preclinical.
