## Abstracts

The global Lipochroman-6 market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Lipochroman-6 is a 'bio-inspired molecule' that is engineered to be similar to gamma-tocopherol. This results in a powerful antioxidant that results in protection from Radical Oxygen, Nitrogen, and Carbonal Species. Studies have shown DMC to have higher antioxidative power than many well-known antioxidants, like Vitamin C, Vitamin E, CoQ 10, Green Tea Extract, etc. In skincare, studies have shown it to have benefits on: wrinkle depth, skin elasticity, dark spots, and hyperpigmentation, and lipid peroxidation. One drawback is that it can only be used in low concentrations because of its solubility and texture

This report studies the global Lipochroman-6 production, demand, key manufacturers, and key regions.
