Abstracts

The global Lipoic Acid market size is expected to reach \$ 251 million by 2032, rising at a market growth of 4.1% CAGR during the forecast period (2026-2032).

Lipoic acid is a vitamin-like compound found in a slightly yellow crystalline powder form. It can be synthetically produced in laboratories for medical use, but is found naturally in abundance in foods such as yeast, liver, kidney, broccoli, spinach and potatoes. Lipoic Acid can be divided into α - lipoic acid (alpha lipoic acid), R- lipoic acid and S- lipoic acid. Common commercially available lipoic acid are alpha lipoic acid, so in the report, the volume of lipoic acid is calculated by alpha lipoic acid.

Lipoic acid manufacturers are mainly concentrated in China, such as Tonghe, Shyndec, Fushilai Pharmaceutical, Maidesen, Taike Biological, DKY Technology and Haoxiang Bio. Tonghe has a long history and is a global leader in this industry. It took a sales share of 70%.

Market drivers of lipoic acid

The growth of the lipoic acid market is driven by multiple factors:

Increased health awareness: As people's health awareness continues to improve, more and more people are paying attention to health products and nutritional supplements. As a substance with multiple health benefits, lipoic acid has received widespread attention.

Rising incidence of diabetes: Rapid changes in lifestyle, race, high-energy diet, lack of exercise, obesity, etc. are the main reasons for the rising incidence of diabetes. As one

of the best health products for the treatment of type 2 diabetes, lipoic acid can improve insulin resistance and nerve damage caused by diabetes treatment, so the market demand continues to increase.

Increasing demand for anti-aging: Lipoic acid has significant antioxidant properties, which can eliminate free radicals and protect cells from oxidative stress, thus having an anti-aging effect. As people's demand for beauty and anti-aging continues to increase, the market demand for lipoic acid is also continuing to grow.

Fitness and sports supplement market: The increasing demand for additional food supplements based on lipoic acid among young people and fitness enthusiasts has driven the growth of the lipoic acid market. Lipoic acid can improve the body's ability to increase muscle and reduce fat and increase energy metabolism rate, so it is favored by fitness people.

In summary, the growth of the lipoic acid market is mainly driven by increasing health awareness, rising incidence of diabetes, increasing demand for anti-aging, and demand in the fitness and sports supplements market.
