Abstracts

Liquid antistatic agent, light yellow transparent liquid at normal temperature, non-volatile, non-flammable, high temperature and mechanical stability, electrical conductivity, good electrochemical stability, and good solubility. Compared with other forms of antistatic agents, liquid antistatic agents have a higher tendency to migrate on the surface of materials. These reagents are mainly used in spray and high-efficiency staining applications. The use of liquid antistatic agents results in non-stick surfaces and effective antistatic properties, which improves weaving operations in the textile industry.
