Abstracts

The global Liquid Caustic Soda market size is expected to reach \$ 41627 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

Pure liquid sodium hydroxide is called liquid caustic soda, which is a colorless and transparent liquid. Liquid caustic soda is an important basic chemical raw material with a wide range of uses. In the chemical industry, it is used to manufacture formic acid, oxalic acid, borax, phenol, sodium cyanide, soap, synthetic fatty acids, synthetic detergents, etc.

There is not much difference between solid caustic soda and liquid caustic soda in terms of application areas. Different countries and regions have different growth rates in different industries. The demand for alumina in China, Japan and South Korea has surged in the past two years. Due to the rebound in GDP growth in Europe and the United States, the overall downstream demand has begun to grow rapidly. Ercros, a European company, even stated that the growth rate of caustic soda should be 1.5 times that of the European region. The Indian market is growing faster in textiles and paper, and the alumina industry is also growing faster. Therefore, in the next few years, the growth rate of the aluminum products industry will perform better in several major application industries.

Global key players of Liquid Caustic Soda include Dow, OxyChem, Westlake, Olin Corporation and Formosa Plastics Corporation, etc. Global top five manufacturers hold a share about 23%. China is the largest market, and has a share about 50%, followed by North America and Europe with share 15% and 14%, separately. In terms of product type, 35%-50% Solution is the largest segment, occupied for a share of 60%. In terms of application, Aluminum Processing has a share about 24%.
