Abstracts

The global Liquid Egg Whites market size is expected to reach \$ 3797 million by 2032, rising at a market growth of 7.4% CAGR during the forecast period (2026-2032).

Liquid egg whites are produced by separating the whites from yolks of shell eggs, followed by filtration, homogenization, and pasteurization. This high-protein, low-fat egg product is especially valued in the health, fitness, and food processing industries. Rich in albumin and virtually cholesterol-free, liquid egg whites are commonly used in applications requiring foaming and gelling properties, such as meringues, soufflés, protein drinks, and nutritional products. Their extended shelf life and ease of handling make them a popular choice for both commercial and institutional kitchens.

This report studies the global Liquid Egg Whites production, demand, key manufacturers, and key regions.
