Abstracts

The global Liquid Sodium Hydroxide market size is expected to reach \$ 41627 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

Liquid caustic soda, known as liquid caustic soda, is a colorless and transparent liquid. Industrial-grade caustic soda often contains impurities, mainly sodium chloride and sodium carbonate, and sometimes small amounts of iron oxide. Liquid caustic soda is an important basic chemical raw material with a wide range of applications. In the chemical industry, it is used to manufacture formic acid, oxalic acid, borax, phenol, sodium cyanide, soap, synthetic fatty acids, and synthetic detergents.

The proportion of caustic soda produced using ion-exchange membrane technology is increasing. Currently, over 90% of the market share is from the ion-exchange membrane method.

Caustic soda is an essential raw material for the cleaning, smelting, and bleaching of industrial materials such as metals. It is also indispensable for removing impurities in the production of cathode materials, a core material for secondary batteries. It is also used to extract aluminum, a key material for lightweight materials, from crude bauxite.

Driven by the rapid growth of electric vehicles, the aluminum industry and the demand for caustic soda in EV batteries are growing rapidly. Companies such as Hanhua have already begun expansion plans for this purpose.

This report studies the global Liquid Sodium Hydroxide production, demand, key manufacturers, and key regions.
