## Abstracts

The global Lithium-based Greases market size is expected to reach \$ 1763.1 million by 2029, rising at a market growth of 5.6% CAGR during the forecast period (2023-2029).

Lithium grease is the most commonly used lubricating grease around the globe - accounting for 75% of lubricating applications across all industries. In the automotive industry it is commonly used as a lubricant in wheel bearing and chassis applications. It demonstrates excellent water resistance and high temperature resistance. This dual capability means it has largely displaced traditional sodium and calcium based greases.

This report studies the global Lithium-based Greases production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Lithium-based Greases, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
